Intersectional Stigma
of Place-based Ageing

Professor Vikki McCall
Principal investigator

Julia Lawrence
Project Co-ordinator

Professor David Manley

Professor Alasdair Rutherford

Dr Louise Reid

Dr Dianne Theakstone

Dr Lisa Davison

Exploring the representation of disability in homes and neighbourhoods (WP1)

Connecting 'ageing-in-place' to lived experiences of stigma (WP2)

Kate Wilson

Co-production & building a cohort of disabled Community Peer-Researchers (WP3)

Professor Rose Gilroy

Dr Kim McKee

Anna Pearce

Tackling inequalities via organizational change, policy & practice (WP4)

Jeremy Porteus

Making change via Inclusive Living (WP5)

AN OVERVIEW OF OUR WORK PACKAGES

Exploring the representation of disability in homes and neighbourhoods (WP1)

Co-production and building a cohort of disabled Community Peer-Researchers (WP3)

Making Change via Inclusive Living (WP5)

Connecting 'ageing-in-place' to lived experiences of stigma (WP2)

Tackling inequalities via organisational change, policy and practice (WP4)

ISPA NETWORKS

COMMUNITY PEER-RESEARCHERS

- Central part of the project
- Leading by lived experience

INCLUSIVE LIVING ALLIANCE

- Coming together to make real change
- Understanding impact

PROJECT ADVISORY BOARD

- Steering project
- Focusing on supporting ethics and inclusion

EARLY CAREER NETWORK

- Encouraging capacity and networks
- Supporting academic and practice routes

WHY INCLUSIVE LIVING?

- The National Records of Scotland estimate that there will be 240,000 more pensioners over the next 25 years, an increase of 23.2% in Scotland, while the working age population reduces.
- We are ALL stakeholders in ageing
- Yet, the housing sector is 'woefully underprepared for ageing' (Lords Select Committee, 2013)
- We must act now to support integrated, accessible housing that supports all groups

A VISION FOR THE HOUSING SECTOR TO SUPPORT HEALTH

- We want to **reset** the way we think and approach important areas such as adaptations, accessibility and independent living. **We do not wish to see these issues as an ‘add on’ to housing.**
- Thinking about Inclusive Living supports housing decisions and development to be supported by strategic thinking inclusion, design and connections
- We developing a toolkit that explores literature around inclusive living and supports organisations as a strategic and operational planning tool

OUR FIRST YEAR ON THE PROJECT

- Publication of our 1-year report Housing LIN ISPA Microsite celebrating the years achievements (report sent to group).
- We have presented ISPA at 47 events (e.g. RIHAF, the WISH Scotland, Housing Quality Network, SCIE showcase webinar and more...

The screenshot shows the Housing LIN website header with a red navigation bar. The main content area features a dark background with the title 'Intersectional Stigma of Place-Based Ageing (ISPA) Project - One year on' in white. Below the title is a circular profile picture of Dr Vikki McCall, followed by her name and title: 'Dr Vikki McCall, Professor of Social Policy, Faculty of Social Sciences, University of Stirling'. The date '27/09/23' is displayed below the name. The breadcrumb trail reads 'Housing LIN > Blogs > Intersectional Stigma of Place-Bas...'. The Housing LIN logo and tagline 'Connecting people, ideas and resources' are visible in the top left, and a search bar and 'LOGIN / REGISTER' link are in the top right.

The Intersectional Stigma of Place-Based Ageing (ISPA) Project is funded by the Economic and Social Research Council to understand and help tackle the negative consequences of stigma and promote inclusive ageing.

COMMUNITY-PEER RESEARCHERS

- We now have nearly 50 CPRs (involving a lot of coffee and cake...)
- We attended the Summit for Persons with Disabilities on 25th November at the Scottish Parliament with CPRs

NEIGHBOURHOOD MAPPING & ETHICS

Name: _____

Description of chosen route?

(Starting location, destination, length of route, etc.)

Empty response box for route description.

Are there accessible toilets nearby?

(Level access, grabrails, emergency cord, etc.)

Empty response box for accessible toilets.

Is there sufficient clear signage?

(Toilets, entry and exit points, etc.)

Empty response box for signage.

Notes/Sketches

Large empty box for notes and sketches.

WHAT ISPA WILL DELIVER

11

Conduct neighbourhood mapping exercises

Mapping of quantitative patterns of inequality

Inclusive Living workshops to facilitate organisational change

Identify how to tackle different types of stigma (related to age, disability and place) & facilitate organisational change that supports accessible and inclusive practice in homes and neighbourhoods.

Quantitative and policy scoping reviews

Develop a new Inclusive Living Toolkit

Establish a new longitudinal qualitative database

INCLUSIVE LIVING ALLIANCE

tenant participation advisory service
